

# SUBJECT INDEX

- Abscess(es), mitral annulus, mitral valve replacement in patients with, 14-26, 15f-26f. *See also* Mitral valve replacement, in patients with mitral annulus abscess
- Annuloplasty  
   Cosgrove ring, for functional tricuspid regurgitation, 184-187, 185f, 186f. *See also* Tricuspid regurgitation, functional, Cosgrove ring annuloplasty for  
   DeVega, of tricuspid valve, 169-176, 170f-175f. *See also* Tricuspid valve, DeVega annuloplasty of  
   Duran ring, of tricuspid valve, 201-212, 202f-212f. *See also* Tricuspid valve, Duran ring annuloplasty of
- Annulus, calcified, mitral valve replacement with, 2-13, 2f-13f. *See also* Mitral valve replacement, with calcified annulus
- Anterior cervicothoracic approach to superior sulcus, for radical resection of lung tumors invading thoracic inlet, 86-93, 87f-92f
- Anterolateral thoracotomy, 104-109, 105f-109f  
   described, 104  
   surgical technique, 105-109, 105f-109f
- Apical axillary thoracotomy, 58-61, 58f-61f  
   surgical technique, 58-61, 58f-61f
- Atresia, pulmonary, tetralogy of Fallot with, conduit repair of, 131-145, 131f-144f. *See also* Tetralogy of Fallot, with pulmonary atresia, conduit repair of
- Atrial switch, Rastelli operation and, for congenitally correct transposition with VSD and pulmonary stenosis, 160-166, 161f-165f. *See also* Congenitally correct transposition
- Autologous pericardial valved conduit, for right ventricular outflow tract reconstruction, 146-149, 146f-149f. *See also* Right ventricular outflow tract reconstruction, autologous pericardial valved conduit for
- Chest, right, mitral valve replacement through, 27-35, 27t, 28f-34f. *See also* Mitral valve repair, redo of
- Conduit, autologous pericardial valved, for right ventricular outflow tract reconstruction, 146-149, 146f-149f. *See also* Right ventricular outflow tract reconstruction, autologous pericardial valved conduit for
- Conduit repair, of tetralogy of Fallot with pulmonary atresia, 131-145, 131f-144f. *See also* Tetralogy of Fallot, with pulmonary atresia, conduit repair of
- Congenitally correct transposition, with ventricular septal defect and pulmonary stenosis  
   atrial switch and Rastelli operation for  
     described, 160  
     surgical technique, 161-165, 161f-165f  
   comments related to, 166
- Cosgrove ring, in mitral valve repair redo, 31, 31f
- Cosgrove ring annuloplasty, for functional tricuspid regurgitation, 184-187, 185f, 186f. *See also* Tricuspid regurgitation, functional, Cosgrove ring annuloplasty for
- Curved axillary thoracotomy, 62-67, 62f-67f  
   surgical technique, 62-67, 62f-67f  
   sutures in, 67, 67f
- DeVega annuloplasty, of tricuspid valve, 169-176, 170f-175f. *See also* Tricuspid valve, DeVega annuloplasty of
- Duran ring annuloplasty, of tricuspid valve, 201-212, 202f-212f. *See also* Tricuspid valve, Duran ring annuloplasty of
- Ebstein's anomaly  
   described, 188  
   tricuspid valve repair for, 188-192, 189f-191f  
     comments related to, 191-192  
     surgical technique, 189-190, 189f-191f  
     sutures in, 189-190, 189f-191f
- Horizontal muscle-sparing incision, 68-70, 68f-70f  
   surgical technique, 68-70, 68f-70f
- Incision(s)  
   horizontal muscle-sparing, 68-70, 68f-70f  
   left thoracoabdominal, 71-85, 72f-83f. *See also* Left thoracoabdominal incision
- Left thoracoabdominal incision, 71-85, 72f-83f  
   comments related to, 84  
   described, 71  
   patient positioning for, 72-73, 72f, 73f  
   postoperative care, 84  
   surgical technique, 72-83, 72f-83f  
   sutures in, 77-83, 77f-83f
- Left ventricle, spontaneous rupture of posterior wall of, after mitral valve replacement. *See also* Mitral valve replacement, spontaneous rupture of posterior wall of left ventricle after, repair of
- Lung tumors, invading thoracic inlet, radical resection of, anterior cervicothoracic approach to superior sulcus for, 86-93, 87f-92f  
   comments related to, 93  
   described, 86  
   surgical technique, 87-92, 87f-92f
- Mitral annulus abscess, mitral valve replacement in patients with, 14-26, 15f-26f. *See also* Mitral valve replacement, in patients with mitral annulus abscess
- Mitral valve repair  
   failure of, late, mitral valve replacement after, 42-50, 43f-49f. *See also* Mitral valve replacement, after late failure of mitral valve repair  
   redo of, 27-35, 27t, 28f-34f  
     clinical summary of, 27, 27t  
     comments related to, 35  
     patient positioning for, 28, 28f  
     preoperative preparation for, 27, 28f  
     surgical technique, 28-34, 28f-34f

- Mitral valve replacement**  
 after late failure of mitral valve repair, 42-50, 43f-49f  
   comments related to, 50  
   described, 42  
   surgical technique, 43-49, 43f-49f  
   sutures in, 47-49, 47f-49f  
 with calcified annulus, 2-13, 2f-13f  
   comments related to, 12  
   preoperative evaluation for, 2  
   surgical technique, 2-12, 2f-12f  
   inspection prior to, 2, 3f  
   suture placement in, 9f-12f  
 in patients with mitral annulus abscess, 14-26, 15f-26f  
   approach to, 14  
   described, 14  
   involving entire circumference of annulus, 23-26, 23f-26f  
   surgical technique, 15-26, 15f-26f  
   sutures in, 17f, 18f, 20f, 21f, 24f, 25f  
   when abscess is confined to posterior mitral annulus, 15-22, 15f-22f  
 spontaneous rupture of posterior wall of left ventricle after  
   repair of, 36-41, 37f-40f  
   comments related to, 41  
   surgical technique, 38-40, 38f-40f  
   sites of, 37, 37f  
   types of rupture, 36, 37f
- Posterior annuloplasty technique, for tricuspid regurgitation, 177-183, 178f-182f. *See also* Tricuspid regurgitation, repair of, posterior annuloplasty technique in**
- Posterolateral approaches, to superior sulcus, 94-103, 95f-102f. *See also* Superior sulcus, posterolateral approaches to**
- Posterolateral thoracotomy, 51-57, 52f-56f**  
 disadvantages of, 51  
 patient positioning for, 52, 52f  
 surgical technique, 52-56, 52f-56f  
 sutures in, 56, 56f
- Pulmonary atresia, tetralogy of Fallot with, conduit repair of, 131-145, 131f-144f. *See also* Tetralogy of Fallot, with pulmonary atresia, conduit repair of**
- Pulmonary stenosis, ventricular septal defect and, congenitally correct transposition with, atrial switch and Rastelli operation for, 160-166, 161f-165f**
- Rastelli operation, 121-130, 122f-129f**  
 atrial switch and, for congenitally correct transposition with VSD and pulmonary stenosis, 160-166, 161f-165f. *See also* Congenitally correct transposition  
 described, 121  
 historical background of, 121  
 repair of  
   outcomes of, 130  
   surgical technique  
   aortic cross-clamp and cardioplegia in, 122, 122f  
   closing patent foramen ovale in, 126, 126f  
   conduit preparation in, 127, 127f  
   Dacron patch insertion in, 125, 125f  
   de-airing in, 129, 129f  
   distal conduit anastomosis in, 127, 127f  
   enlarging VSD in, 124, 124f  
   finished conduit in, 129, 129f  
   oversewing pulmonary valve in, 126, 126f  
   proximal conduit anastomosis in, 128, 128f  
   right ventriculotomy in, 123, 123f  
   surgical technique, 121-129, 122f-129f  
   cardiopulmonary bypass, shunt ligation, and division in, 122, 122f
- Regurgitation, tricuspid. *See* Tricuspid regurgitation**
- Reparation a l'Etage Ventricular (REV procedure), 150-159, 151f-159f**  
 described, 150  
 surgical technique, 151-159, 151f-159f
- REV procedure, 150-159, 151f-159f. *See also* Reparation a l'Etage Ventricular (REV procedure)**
- Right ventricular outflow tract reconstruction, autologous pericardial valved conduit for, 146-149, 146f-149f**  
 described, 146  
 patient positioning for, 146, 146f  
 surgical technique, 146-149, 146f-149f
- Stenosis(es), pulmonary, ventricular septal defect and, congenitally correct transposition with, atrial switch and Rastelli operation for, 160-166, 161f-165f**
- Superior sulcus**  
 anterolateral cervicothoracic approach to, for radical resection of lung tumors invading thoracic inlet, 86-93, 87f-92f. *See also* Lung tumors, invading thoracic inlet, radical resection of  
 posterolateral approaches to, 94-103, 95f-102f  
   comments related to, 103  
   described, 94  
   patient positioning for, 95, 95f  
   surgical technique, 95-102, 95f-102f
- Suture(s)**  
 in Cosgrove ring annuloplasty for functional tricuspid regurgitation, 185-186, 185f, 186f  
 in curved axillary thoracotomy, 67, 67f  
 in DeVega annuloplasty of tricuspid valve, 173-174, 173f-175f  
 in Duran ring annuloplasty of tricuspid valve, 207-210, 207f-210f  
 in left thoracoabdominal incision, 77-83, 77f-83f  
 in mitral valve replacement  
   after late failure of mitral valve repair, 47-49, 47f-49f  
   with calcified annulus, 9f-12f  
   in patients with mitral annulus abscess, 17f, 18f, 20f, 21f, 24f, 25f  
 in posterior annuloplasty technique in tricuspid regurgitation repair, 180-182, 180f-182f  
 in posterolateral thoracotomy, 56, 56f  
 in repair of spontaneous rupture of posterior wall of left ventricle after mitral valve replacement, 38f-40f, 38-40  
 in tricuspid valve repair for Ebstein's anomaly, 189-190, 189f-191f

- in truncus arteriosus repair, 117, 117f, 118, 118f, 120, 120f
- Tetralogy of Fallot, with pulmonary atresia, conduit repair of, 131-145, 131f-144f
  - comments related to, 145
  - described, 131
  - extracardiac conduit selection for, 132
  - failure of, 145
  - investigations in, 132
  - outcome of, 145
  - patient positioning for, 133, 133f, 134, 134f
  - reoperation reduction in, 145
  - surgical strategy in, 132
  - surgical technique, 133-144, 133f-144f
- Thoracic inlet, lung tumors invading, radical resection of, anterior cervicothoracic approach to superior sulcus for, 86-93, 87f-92f. *See also* Lung tumors, invading thoracic inlet, radical resection of
- Thoracoabdominal incision, left, 71-85, 72f-83f. *See also* Left thoracoabdominal incision
- Thoracotomy
  - anterolateral, 104-109, 105f-109f. *See also* Anterolateral thoracotomy
  - apical axillary, 58-61, 58f-61f
    - surgical technique, 58-61, 58f-61f
  - curved axillary, 62-67, 62f-67f. *See also* Curved axillary thoracotomy
  - posterolateral. *See* Posterolateral thoracotomy
- Tricuspid regurgitation
  - assessment of, 169
  - causes of, 177, 184
  - functional
    - Cosgrove ring annuloplasty for, 184-187, 185f, 186f
    - comments related to, 186
    - surgical technique, 185-186, 185f, 186f
    - sutures in, 185-186, 185f, 186f
    - vs.* organic, 169
  - incidence of, 169, 177
  - repair of, posterior annuloplasty technique in, 177-183, 178f-182f
    - comments related to, 182-183
    - patient positioning in, 178, 178f
    - procedure, 178-182, 178f-182f
    - sutures in, 180-182, 180f-182f
- Tricuspid valve
  - anatomic relationships of, 202, 202f
  - anatomy of, 203, 203f
  - characteristics of, 201
  - DeVega annuloplasty of, 169-176, 170f-175f
    - surgical technique, 170-174, 170f-175f
    - sutures in, 173-174, 173f-175f
  - Duran ring annuloplasty of, 201-212, 202f-212f
    - comments related to, 212
    - surgical technique, 204-212, 204f-212f
    - sutures in, 207-210, 207f-210f
  - normal, surgical view of, 206, 206f
  - pathologic, surgical view of, 206, 206f
  - repair of, for Ebstein's anomaly, 188-192, 189f-191f. *See also* Ebstein's anomaly, tricuspid valve repair for
  - replacement of, *vs.* repair, 169-170
- Truncus, classifications of, 111, 111f
- Truncus arteriosus, repair of, 111-120, 111f-120f
  - comments related to, 120
  - described, 111
  - postoperative care, 120
  - surgical technique, 112-120, 112f-120f
    - sutures in, 117, 117f, 118, 118f, 120, 120f
- Tumor(s), lung. *See* Lung tumors
- Ventricle(s), left, spontaneous rupture of posterior wall of, after mitral valve replacement, repair of, 36-41, 37f-40f. *See also* Mitral valve replacement
- Ventricular septal defect, pulmonary stenosis and, congenitally correct transposition with, 160-166, 161f-165f
  - atrial switch and Rastelli operation for, 160-166, 161f-165f. *See also* Congenitally correct transposition
- Ventricular septal defect (VSD) suture placement, in Rastelli operation, 125, 125f
- VSD. *see* Ventricular septal defect (VSD)
